EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The first paragraph of Specification, page 1, has been replaced with the following:

--This application is a divisional of prior U.S. Application No. 10/279,133, filed October 22, 2002, now U.S. Patent 6,644,857, which application is a divisional of prior U.S. Application 09/885,502, filed June 20, 2001, now U.S. Patent 6,520,679, priority from the filing date of which is hereby claimed under 35 U.S.C. § 120, which application is based upon and claims the benefit of priority from Japanese Patent Application No. 2000-189977, filed June 23, 2000, the entire contents of which are incorporated herein by reference.—

Note: the above changes were made to reflect the issuance of the priority application.

Allowable Subject Matter

2. Claims 1-3 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest a method of manufacturing a rolling guide apparatus comprising a first slide member including a pair of wing portion and a connecting portion, by "creating a residual compression stress region on the surface region of the first slide member;" and "regulating the residual compression stress region by working to deform the connecting portion, and adjusting a pre-load on the rolling elements in accordance with the deformation," in combination with the other claimed subject matter.
4. Applicant's characterization of the prior art is germane. See Specification, pages 1-3. The prior art does not teach or suggest the controlling the pre-loading by working the connecting portion.
5. U.S. Pat. 6,073,337 discloses a method of adjusting the curvature of a sliding bearing, by a similar process. However, the reference does not teach or suggest using the method to adjust the pre-load of a rolling guide apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
